

CAVBOTICS
8590

Sponsorship Packet

2023 - 2024

Our Team

Cavbotics Team 8590 is a student-led organization, founded in 2020. Since it's founding, our team has grown to have over 60 members coming from a variety of experience levels.

We are committed to encouraging students to actively participate and contribute new ideas to the group, fostering a collaborative, stimulating, and diverse learning environment. By engaging in technical activities, Team 8590 promotes creativity and creates future leaders and innovators, instilling a passion for STEM in its members.

In the past, our team has extended our community outreach and improved our engineering capabilities. This led us to winning the **Rookie all-star award** in both the regional and district level. This qualified us for the **FIRST World Championships** where we were awarded the **Highest Rookie Seed Award** making us one of the highest performing teams in the world.

What is FRC?

"To transform our culture by creating a world where science and technology are celebrated and where young people dream of becoming science and technology leaders."

- Dean Kamen, FIRST Founder

Under strict rules, limited resources, and an intense time limit, high school students work with professional mentors to overcome an obstacle using engineering and programming skills. At competitions, each team must work with other teams in alliances to play the game, all while being judged on design, innovation, and performance.

Combining the excitement of sport with the rigors of science and technology, the FIRST Robotics Competition is the ultimate "Sport for the Mind" that is simultaneously challenging and enjoyable.

- 87% of participants aim to become scientists or engineers
- Over 75% of FIRST alumni are in the STEM field as a student or professional
- Girls in FIRST have a drastically increased understanding STEM compared to those who are not
- Students are over 2 times as likely to gain a deeper understanding of STEM

In addition to our success in competitions, we strive to share our passion for STEM within our community. We have an outreach program with the goal of getting younger students interested in and excited about robotics and STEM. For example, our team has demonstrated our robot and worked with the students at Frost Middle School. Many of these students have become Cavbotics team members upon entering high school.

Our Members have the opportunity to:

- Gain a no-cost, hands-on experience of designing and building a robot
- Develop skills such as collaboration, leadership, responsibility, time management, and gracious professionalism

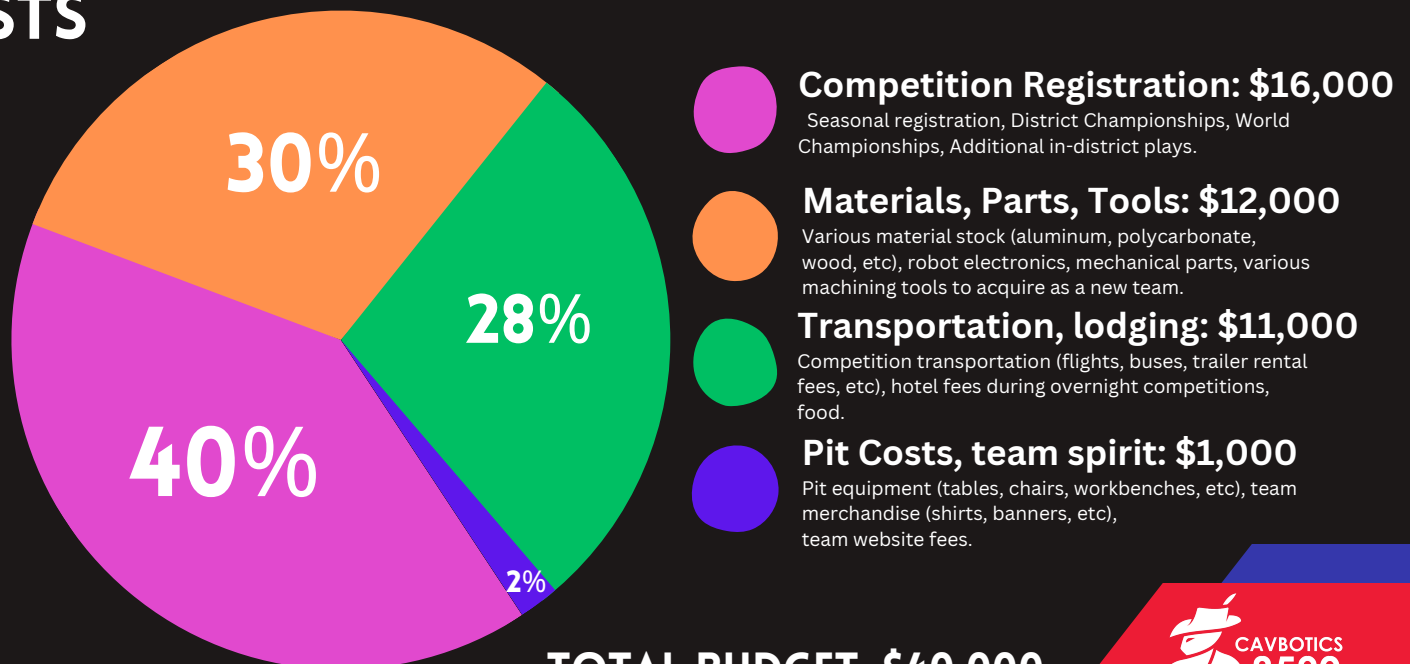

Budget & Fundraising

Overview

A typical FIRST robotics team requires funding of around \$20,000 - \$50,000. This season, our ultimate goal is to once again compete in the FIRST World Championship in Houston, Texas. We are thus aiming to participate in at least 2 district events and the district championship, which will provide us with the opportunity to qualify for the world championship. A majority of our budget will cover the designated registration fees as well as the travel, lodging, and food expenses for these competitions. Our budget also factors in the costs of necessary materials, parts, tools, and machinery for building a winning robot. **We do not have a membership fee** to get rid of the financial barrier to entry. Finally, our budget accounts for team branding in order to increase public awareness of both the team and its sponsors. Below is an overview of the projected team expenditures and budget.

COSTS

Sponsorship Information

Levels:

All sponsorship levels will receive the benefits of all previous levels. All incentives are negotiable. Donations of materials and services will also be accepted and the sponsorship level will be determined from the fair market value.

Platinum:

\$5,000 +

- Large company logo on T-shirt, promotional materials, and website
- Large logo on robot
- Dedicated banner in the pit
- Team gifts and merchandise

Gold:

\$2,000 - \$5,000

- Medium Company logo on T-shirt and promotional materials
- Medium logo on robot
- Logo on team banner and website

Silver:

\$500 - \$2,000

- Small Company Logo on T-shirt and promotional materials
- Small logo on robot
- Name and logo on team videos and website

Bronze:

\$250 - \$500

- Business name and logo on website
- Social Media shoutout on Instagram
- Thank you letter

Make your donation by check to: Woodson High School 9525 Main St, Fairfax, VA 22031 in the address line and then "For FRC" in the memo
