Our Team

Woodson Cavbotics is a student-led, mentor-guided, public high school robotics team that welcomes all students regardless of gender, race, sexual orientation, prior knowledge, or financial background. All students are welcome to fully experience STEM by designing, building, testing, programming, and driving the best robot we can make. This club also allows students to have leadership roles and work with a team as we explore other important areas such as business, budgeting, and data analysis to help us win and pick a successful team. Our students have fun while learning and gaining real-life experiences.

The Cavbotics team was founded in 2021 and found early success in 2022 winning the Rookie Allstar award. This earned them one of the few spots in the FIRST Championship Division playoffs where they finished as the highest rookie seed. The following year, due to a lack of members and resources, the team performed poorly in comparison. Unhappy with their circumstances, the team reached out to Woodson's Engineering Teacher requesting that he be the new Lead Mentor and Faculty Advisor, and he accepted! Now the team has new life, a membership near 80 students and ambitions of winning the local tournaments and participating in the next world championship.

About FIRST

“Kids have a natural curiosity, creativity, and desire to explore. At FIRST®, we understand the power of STEM (science, technology, engineering, and math) to inspire their innovative spirit and boost self-esteem.

FIRST is More Than Robots®. Our PreK-12 programs are designed to help all young people develop creative problem-solving, leadership, and communications skills. Supported by a network of mentors, educators, volunteers, sponsors, parents, and alumni in over 100 countries, the FIRST experience gives participants lasting inspiration and confidence to build a better future for themselves and their communities.”

- For Inspiration and Recognition of Science and Technology

Meet Our Team!

The students in our club come from different backgrounds and experience levels, for many different reasons. With the numerous opportunities our club provides, students have been able to expand their skills and find new interests through this program.

**Grade:
9th**

**Ethan
McBurney**

“I joined Cavbotics because I wanted hands-on work experience with mechanical engineering. This program allows me to gain that experience by working with advanced power tools and machines.”

“I joined the robotics club because I wanted to learn new STEM skills that I could use in the future. I have also been able to learn a lot throughout the season as well through my experiences.”

**Grade:
10th**

**Juni
Shin**

**Grade:
11th
Aisha
Alvarado
-Escalera**

“I joined Cavbotics because I wanted to learn more about STEM and it seemed interesting. Joining this club has allowed me to collaborate with people with similar interests and learn a lot through working with new tools.”

“I joined robotics to do hands-on STEM projects while being part of a welcoming community. It contains multiple aspects of STEM like electrical and mechanical work and lets students branch out and gain experience.”

**Grade:
12th**

**Indra
Ranjan**

Team History

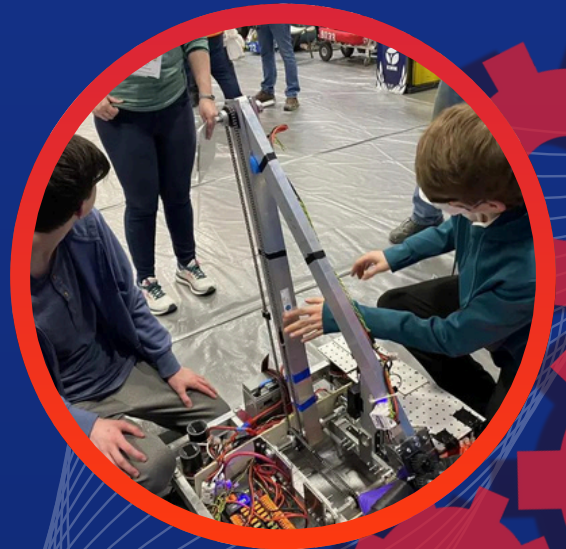

2022 - Rapid React

In Rapid React, teams competed against each other to score points by shooting cargo into the center hoop. Our team made it to 4 events, winning 6 awards, including the Rookie Inspiration award and a world championship division's highest rookie seed award.

2023 - Charged Up

In Charged Up, teams compete to put cones and cubes on designated nodes to score points. Teams can also score points by balancing their robots on the platform. At the end of the game, teams balance all of their robots to score extra points. At this event, our team competed in two qualifying events.

2024 - Crescendo

In Crescendo, teams would shoot or insert foam hoops into deposits on the sides of the arena to score points. At the end of the game, teams would try to hang onto metal chains to score extra points. In this event, our team competed at two qualifying events and won the Innovation in Control award.

Outreach

**Mentoring the local
FLL team**

This year, the Cavbotics club is focusing on expanding and reaching out. Our mission is to encourage and inspire students to pursue STEM and give them real-world experiences to ensure that they succeed in the workforce, and that mission doesn't only apply to our school.

**Supporting the local
FTC team**

- **We have been reaching out and mentoring a local elementary school FLL team.**
- **Our members helped to establish a local middle school FTC team, and several have volunteered to mentor them.**

- **We also influence our own school's community by taking part in large events and teaching new members.**

There is still much more to come! We strive to make a positive impact on the community we live in.

Hey Day at C. G. Woodson

Our Budget & Tiers

Competition Fees

Preseason	Day Zero Event Off Season Events	500 1,000
Regular Season	2 District Events	6,000
Championship	District Championship FIRST Championship	4,000 5,750

Equipment

Robot Parts	Belts & Gears Elevator Components Gear Box 6 @80 Motors 12 @199 Parts and Frame Swerve Flipped 6 @325 Wheels	3,000 3,000 480 2,388 5,000 1,950 400
Other Gear	Game Pieces Shirts Uniform	500 2,000

Outreach

Outreach	Outreach Equipment Outreach Event Space Outreach MISC	2,000 3,000 3,000
----------	---	-------------------------

Travel

Regular Season	Local Meals 1 Event Travel District Events	600 4,000
Championship	Travel District Championship Travel Worlds	7,000 25,000

Wheel: \$0-2.5K

- Thank you note
- Social media mention
- Logo on our website

Battery: \$2.5-7.5K

- Team photo + thank you sign
- Highlight on social media
- Small logo on robot

Motor: \$7.5-10K

- Medium Banner with team picture
- Name and logo in public videos
- Medium sized logo on robot

Motherboard: \$10-15K

- Large banner with team picture
- Extensive social media coverage
- Large logo on robot

Driver: \$15K+

- Name the robot
- Team gifts and merchandise
- Large signed photo of the team

Each higher tier contains all of the previous tiers' benefits

Thank You!

Any support would be greatly appreciated!

501.3.c with Educate Fairfax

Our mission as a student-run FIRST Robotics Competition team is to create a welcoming and encouraging environment that enables STEM students to improve their skills in robotics and the engineering process. As a student-run team, we have extra responsibilities, as we take it upon ourselves to educate new members and ensure that they succeed when they eventually pursue STEM in the future. We encourage our students to make connections and support them to make sure everyone's voices are heard in the club. Lastly, our goal is to succeed, as we can reach more people through our achievements and help more students in the future. Together, these things drive our determination and help to make our team environment the best it can be.

Every contribution will be put to good use, and each will help our team continue to inspire future generations of STEM students!

**Thank you,
The Cavbotics Team**
